BOOK SHAPED TRAP / TRAMPA LIBRO

The **book shaped trap** is the best pro-environmental alternative for rodent control - with multiple uses and with excellent results. Its thick layer of adhesive and natural attractant allows capture medium and large rodents.

The rigid and reinforced structure prevents the trap being moved by the rodent.

Exclusive formulation

Its unique formulation allows this trap remains active between 30-90 days according to the environmental characteristics of treatment site.

Designed to capture, remove and monitor rodents in places where chemical control is prohibited or restricted or parallel to rodenticides control.

It is recommended to check the adhesiveness in places with large amount of pollutants in the air that can form a layer that prevents or decreases the catch.

Precautions

Keep out of reach of children and animals. Accidental contact with the adhesive, use oil to remove it from the skin.

To easily clean the floors or other surfaces using paint removers (thinner or turpentine).

Do not expose to high temperatures or heat sources.

1. Place the trap in closed position in the right environment.

2. Open the trap on the frontside into a L shape.

3. In the case of contact with the traps, remove glue with vegetable oil followed by washing with warm water.

Avoid the following:

Avoid exposure to children, pets and other animals or birds.

Children

Pets

Birds

Rain

Sun

Dirt

Specifications:

name	Trap for Rodents
application	monitoring and capturing rodents
material	rigid cardboard and pro-environmental resistant
characteristics	ultra strong glue, stable in a wide range of temperature and humidity conditions
method of set-up	flat or folded - on the floor
specific instructions	WARNING: strong glue - keep away from children and animals
